Inventory Management System

A web-based admin panel built with Laravel for managing inventory, purchases, sales, and warehouses.

Features

- User authentication and profile management
- Role and permission management
- Products, categories, and brands
- Suppliers, customers, and warehouses
- Purchases, sales, and returns
- Stock transfers between warehouses
- PDF invoices
- Reports with date filters

Requirements

- PHP 8.2 or higher
- Composer
- Node.js and npm
- MySQL (or another database supported by Laravel)

Installation

```
# Clone the repository
git clone <your-repo-url>
cd <project-folder>

# Install dependencies
composer install
npm install

# Configure environment
cp .env.example .env
php artisan key:generate
```

Update the database settings in `.env`, then run:

```
php artisan migrate
npm run build
php artisan serve
```

The app will be available at `http://localhost:8000`.

Usage

1. Register or log in.
2. Add your warehouses, suppliers, customers, brands, and categories.
3. Add products.
4. Record purchases and sales to update stock.
5. View reports from the Reports menu.

Tech Stack

- Laravel
- Laravel Breeze
- Spatie Laravel Permission
- Intervention Image
- Laravel DomPDF
- Bootstrap 5
